DETOUR[®] 10oz. Caulking Tube Applications

About the Product

The patented capsaicin-based DETOUR[®] 10 oz. Caulking Tube (EPA #85002-1, NSF Approved) gives you the coverage and reach to tackle everything from **sealing home perimeters and fence lines to larger infestations**. It works equally well around **barns, grain storage, and outdoor equipment** and in **commercial and industrial settings**. The larger format makes it the go-to choice for **warehouses, factories, self-storage facilities, and food preparation environments** like restaurant kitchens, supermarkets, and food processing plants.

How to Apply the Product

- **Wear protective gloves** to ensure safe handling.
- Cut nozzle tip to **right above the threads**. Load tube into a standard caulking gun and attach nozzle tip if desired.
- For best results, **clean and dry the surface prior to application**.
- For best results, **apply to a non-porous surface**.
- Apply a **continuous ½ inch bead** along any **horizontal or vertical surface** where activity has been identified.
 - **Horizontal and vertical surfaces** – apply in a zig-zag pattern for maximum coverage.
 - **For additional coverage** – using a brush or gloved hand, smear gel into a ¼” - ½” thick layer across treated area
 - **Holes or entry points (circular, square)** – apply gel along the inside edge and outside of the hole to create a full barrier.
 - **Round or circular objects** – apply product around the full circumference for a complete deterrent line.
 - **Irregular or uneven surfaces** – apply a thicker bead to ensure full surface contact.
 - **Wiring**- apply bead onto wire, with a gloved hand or brush, smear gel completely around wire for full coverage.
- **If applying to a porous surface, a second layer may be required.**
- Utilize to **refill the DETOUR[®] RatTrax[®] Tracking Tunnel**.
- Inspect treated areas regularly and reapply as needed.
- Store in a cool, dry place.

Recommended Application Areas

- Full Home Interior/Exterior Perimeter and Foundations
- Along Fence Lines and Yards
- Large Door and Window Frames
- Deck and Porch Perimeter Base Edges
- Around Corners and Roll up Doors
- Utility Panels
- Commercial Restaurant and Food Preparation
- Barn and Farm Structures
- Nurseries and Greenhouses
- Large Utility Vaults
- Warehouse/Facility Loading Dock Perimeters
- Any Rat and Mice Entry and Exit Points
