Contact with Gel Sends Them Fleeing!

DETOUR® 11 oz. Aerosol Spray Can Applications

About the Product

From protecting homes, vehicles or commercial properties, the patented DETOUR® Wire Protection gel in an 11 oz. aerosol can delivers **broad, effortless coverage in hard to reach and expansive areas** that other formats cannot access. The product can be used in wide area applications in **industrial lighting circuits, warehouse and commercial wirings, and landscape lighting**. It can also be applied to **stationary, automotive, and agricultural equipment**. It is the ideal tool to protect against damage to wiring and hoses in **automobiles, RVs, tractors, boats, motorcycles, ATVs, stationary generators, and more**.

How to Apply the Product

- Wear **protective gloves, eye protection**, and ensure there is **proper ventilation** in the treatment area.
- For best results **clean and dry the non-porous surface before application**.
- For a porous surface, apply a sealant before application, such as a silicone or **DETOUR® surface sealant**. Will leave a white film if not used properly.
- Shake can **extremely well** and remove cap for use.
- Point nozzle towards treatment area. Spray from **4 to 6 inches away** until area is generously coated.
 - **Multiple layers may be necessary** for an adequate protection barrier.
 - **Do not remove excess product** unless dripping.
- For **wire protection, ensure entire wire surface is covered for full protection**.
- Use the **attached red nozzle to reach deep cracks or hard to reach places**.
- Reapply as needed.
- Cap product and store **between 20°F-130°F** when not in use.
