DETOUR[®] 8oz. Resealable Squeeze Tube Applications

About the Product

The patented capsaicin-based DETOUR[®] 8 oz. squeeze tube (EPA #85002-1, NSF Approved) is designed for **precise and targeted application** in hard-to-reach spaces where rodents are most active in **residential, commercial, or automotive projects**. Its hand-controlled design makes it **ideal for spot treatments along baseboards, cabinet corners, plumbing penetrations, entry and exit points**.

How to Apply the Product

- **Wear protective gloves** to ensure safe handling.
- Uncap tube and cut nozzle to right above the threads.
- For best results, **clean and dry the surface prior to application**.
- For best results, **apply to a non-porous surface**.
- Apply the product in a **continuous ½ inch bead** along any **horizontal or vertical surface** where activity has been identified.
 - **Horizontal and vertical surfaces** – apply in a zig-zag pattern for maximum coverage.
 - **For additional coverage** – using a brush or gloved hand, smear gel into a ¼” - ½” thick layer across treated area.
 - **Holes or entry points (circular, square)** – apply the gel along the inside and outside edge to create a complete barrier.
 - **Round or Circular objects** – apply product around the entire circumference for a full deterrent line.
 - **Irregular surfaces** – apply a heavier bead to ensure full surface contact.
 - **Wiring** – apply bead onto wire, with a gloved hand or brush smear the gel completely around the wire for full coverage.
- **If applying to a porous surface, a second layer may be required.**
- Utilize to refill the **DETOUR[®] RatTrax[®] Tracking Tunnel**
- Inspect treated areas regularly and reapply as needed.
- Reseal tube after each use and store in a cool, dry place.

Recommended Application Areas

- Pantry, Kitchen, and Food Storage Areas
- Behind/Underneath Appliances
- Plumbing Pipes/Utility Lines
- Along Baseboards
- Inside Cabinet Corners and Drawer Edges
- Wall Voids
- Sheds/Patio Decks
- Automotive Wiring
- Attic or Basement Beams
- Sewer Vents/Roof Vents
- Top and Bottom of Rain Gutters
- Other Rat and Mouse Entry and Exit Points
